Pirates Ahoy –
Wind Powered Boat

1. Secure three corks side by side using two rubber bands.

2. Cut out and decorate a sail. You can choose what size and shape you would like it to be. Attach it to your mast (skewer) by making holes or with sticky tape.

3. Get an adult to help insert your mast and sail into the middle cork.

4. Take your completed ship to the water channels and race it using wind power.
